

G2050 GET READY
FOR 2050
SUSTAINABILITY WEBINAR SERIES 20TH MAY | 27TH MAY | 1ST JUNE

GET READY FOR 2050:

Revisit the online event series that explored and supported SECAP development, implementation and financing

The [PentaHelix project](#) and the **#GRF2050 team**, would like to warmly *thank all* of those who made this online event series such a success: More than *200 different participants* joined all 3 sessions, representing local and regional authorities, energy agencies, consultancies, academia and networks.

The Covenant of Mayors for Climate & Energy – Europe, together with PentaHelix & C-Track 50 (both H2020 projects) joined forces to organise a unique joint event series to support participants in developing, implementing, and financing sustainable energy and climate action plans by focusing on three fundamental axes: **Building effective collaborations, planning for the future, and finding available financing sources and funding schemes.**

The sessions counted with the support from the European Commission, notably through

inspiring and informative addresses from DG REGIO, DG CLIMA, DG ENER, but also from the European Investment Bank.

In case you missed it or would like to revisit the sessions, recordings are [now available](#), as well as speakers' presentations:

- How to build effective collaboration processes – [Session 1](#)
- How to successfully plan for the future – [Session 2](#)
- How to finance climate and energy plans – [Session 3](#)

Let's get back to our intense and fascinating event!

Click and watch the recording of SESSION 1

In this first session, we focused on **multi-level governance**. Guri Bugge, Viken County, a partner in the PentaHelix project presented on *Multi-Level Governance – experience from the Pentahelix project*.

Check out the [speakers' slides](#) of SESSION 1.

Click and watch the recording of SESSION 2

In the second session, we focused on **climate and energy planning**. Ana Lovrak, UNIZAG FSB, coordinator of the PentaHelix project, presented on *Multi-stakeholder approach in energy and climate planning, the PentaHelix approach*.

Check out the [speakers' slides](#) of SESSION 2.

Click and watch the recording of SESSION 3

In the third session, we discussed **available financing sources and funding schemes for local/regional stakeholders' sustainable energy projects**. We focused on public procurement of innovation (PPI), energy performance contracts (EPC), ELENA facility (European Local Energy Assistance), energy communities and crowd-funding.
